

NRUSINGHA PRASAD ACHARYA

Results-oriented Senior Consultant with 12+ years of expertise in Data Engineering and Generative AI, specialising in Cloud Solution Architecture (Azure), Databricks Platform, and leading large-scale Digital Transformations.

Bangalore| +91 8553143252|reach2nprasad@gmail.com

PROFESSIONAL SUMMARY

- 12+ years of experience in data engineering, designing, building, and optimising data pipelines and architectures for scalable data processing.
- Strong background in Azure Databricks, Azure Data Factory, SQL, Python, PySpark, data modelling, and Azure cloud services.
- Proven experience delivering data platforms, automated ingestion frameworks, customer-data solutions, and performance optimisation initiatives while working with data scientists, analysts, and business stakeholders.

CORE COMPETENCIES

- **Modern Data Engineering:** Designing and developing scalable data pipelines, data lakes, data warehouses, and data marts.
- **Azure Data Platform:** Azure Databricks, Azure Data Factory, Azure Storage Accounts, Azure Functions, Logic Apps, and Azure Cache for Redis.
- **Big Data & Distributed Processing:** PySpark, Spark, HiveQL, Sqoop, AWS S3, and large-scale data transformation workflows.
- **Data Quality & Governance:** Data cleaning, validation, standardization, business validation rules, data integrity, and governance practices.
- **Performance Engineering:** Optimization of long-running pipelines, runtime improvement, root cause analysis, and operational efficiency.
- **Data Integration & Automation:** Control-table-driven ingestion, incremental and full loads, parallel ingestion, triggers, and automated workflows.
- **Customer Data & Analytics:** Customer feedback, sentiment/NPS initiatives, campaign support, connected-vehicle data, and actionable insights.
- **Collaboration & Delivery:** Working with data scientists, analysts, business stakeholders, and development teams to deliver reliable data solutions.

PROFESSIONAL EXPERIENCE

Ernst & Young LLP | Bengaluru, India | Senior Consultant- Tech Consulting| Sept 2021– Current

- Architected and delivered 20+ scalable data pipelines across **Azure Databricks**, integrating 5+ enterprise data sources including SQL Server, SAP, SharePoint, manufacturing systems, connected vehicles, and customer platforms.
- Designed and deployed the "Symphony" data platform across on-premises and cloud environments, supporting 3+ data sources, downstream applications, and a large volume of enterprise data.
- Built 10+ automated WhatsApp data pipelines and bot solutions supporting 2L+ customer interactions/month for service reminders, vehicle feedback, customer engagement, and NPS measurement across 20+ KPIs.
- Implemented metadata/control-table-driven ingestion frameworks supporting both full and incremental data loads across 20+ datasets, reducing manual onboarding/configuration effort by approximately 90%.
- Established enterprise data-quality frameworks covering cleansing, validation, standardisation, and reconciliation, improving data accuracy/completeness by 90% and reducing recurring data-quality issues.
- Managed and optimised data lake, data warehouse, and data mart platforms business applications/users.
- Engineered secure data-sharing architecture using dynamic SAS token generation and custom-domain integration, enabling controlled Azure Blob Storage access for 5+ external vendor partners.
- Received the **EY Rising Star Award** for delivering key project/client initiatives, recognised for technical contribution, solution delivery, and successful **execution of client-critical data engineering initiatives**.

IQVIA | Bengaluru, India | Senior Data Engineer | Jan 2018 – Sep 2021

- Developed and maintained end-to-end data pipelines on AWS/Qubole using **PySpark, Spark SQL, Python, and Hive**, covering data ingestion, transformation, business logic, validation, and downstream delivery.
- Migrated and processed [100 GB] of historical healthcare data from relational systems into the CDW platform using Sqoop, ensuring reliable and consistent historical data availability.

- Built scalable Spark-based processing workflows integrating 4+ data sources / datasets from AWS S3, VDW, and CDW, using PySpark RDDs, DataFrames, and Spark SQL for large-scale data transformation.
- Applied complex healthcare business rules and data transformation logic to historical datasets, ensuring data standardization, integrity, and compliance with downstream business requirements.
- Automated Spark and Hive job execution using Qubole Workflow Scheduler, including job dependencies, workflow orchestration, unit testing, code migration, and production deployment.
- Developed reusable SQL, HiveQL, and PL/SQL scripts for data analysis, validation, integrity checks, extraction, and FTP-based data delivery, supporting reliable end-to-end data workflows.

ORACLE | Bengaluru, India | Staff Consultant | Oct 2015 – Jan 2018

- Worked as an Oracle FCUBS Database Developer and OFSAA Analytics Consultant, developing banking data solutions using Oracle SQL, PL/SQL, FCUBS, OFSAA, **Hive, Hadoop, and Sqoop**.
- Developed and optimised Oracle PL/SQL packages, procedures, functions, triggers, views, tables, indexes, and sequences supporting FCUBS modules, data extraction, business rules, and data warehouse loading.
- Contributed to OFSAA Analytics initiatives by extracting and integrating FCUBS banking data into the Hadoop ecosystem using Sqoop and Hive, supporting analytical and historical data processing.
- Implemented banking business rules, data transformations, validation, reconciliation, and KPI calculations across Oracle/FCUBS and OFSAA analytical datasets.
- Developed Hive queries and Sqoop-based data ingestion workflows for processing large banking datasets and supported data movement between Oracle/FCUBS and Hadoop/Hive environments.

Cegedim India Pvt Ltd | Bengaluru, India | Consultant | June 2014 – Sept 2015

- Developed and maintained Oracle PL/SQL procedures, functions, packages, triggers, and database objects to support application and data-processing requirements.
- Managed daily/weekly database jobs and ad hoc requests, performing basic troubleshooting and resolving issues within defined SLA timelines.
- Implemented exception handling and PL/SQL performance techniques such as BULK COLLECT, while working with tables, sequences, constraints, and indexes.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python, PySpark, SQL, PL/SQL, FastAPI
- **Azure Services:** Azure Databricks, Azure Data Factory, Azure Logic Apps, Azure Functions, Azure Cache for Redis, Azure Blob Storage
- **Data & Databases:** Delta Lake, MongoDB, SQL Server, SAP, Oracle, Hive/HiveQL
- **Big Data & Cloud:** Spark, Sqoop, AWS S3, Qubole

EDUCATION & CERTIFICATIONS

- Master in Computer Application | CV Raman Academy, Bhubaneswar.
- Bachelor of Computer Application | F.M University, Balasore.
- **Certifications:** Databricks Certified Associate
